Description

Suspended picture frames for hanging posters portrait

These double-sided suspended picture frames are perfect for creating eye-catching window displays and in-store promo displays. Suspend single frames or stack multiples in either portrait or landscape (see details below) - whatever suits your display requirements and space best! Stack displays are popular with estate and travel agents and being double-sided you can catch the attention of passers-by and in-store browsers.

- The easy to use open-and-shut frames make poster changes super quick without the need to take down the frame
- Each double-sided snap frame has a 25mm surround to make your posters stand out

- Available in portrait or landscape orientation - make sure to choose the right option for your needs!
- Screw-in hanging eyes are supplied for suspending the frame. Use with our fully adjustable ceiling wire kits or with basic double-ended hooks.
- Frames are easy to stack for multi-layer displays - just pass hanging wires down between the back-to-back frames. To grip the wires and for convenient height adjustment order Stopper fittings and floor to ceiling cable kits.

See **more information** for advice on suspending, stacking and fixing.

Suspended picture frames for hanging posters Landscape

- Landscape double-sided snap frames are available here

Additional Information

More Information	**Installing your suspended poster holder** Unlike ordinary snap frames, these two-sided poster frames have to be ordered for either portrait or landscape use. They can be suspended individually - or one above the other with the suspension cables passing down through the interior core of the top frame and down to the next. **Stacking your suspended picture frames** As with cable display systems using acrylic frames, double-sided snap frames can be secured on cables that run floor to ceiling (we can supply the necessary fittings to achieve this - see floor-to-ceiling cable kits). **Note** that the frames either have to be the same size - OR at least the same width. That means an A2 portrait frame can be combined with one or more A3 landscape frames in a single array. Likewise, A1 portrait can be combined with A2 landscape and so forth, because the frame widths match - and so too will the hole centres for hanging. **Fixing your frames** For simple installations such as suspending a solitary double-sided snap frame, the supplied 'hanging eyes' can be used. These screw into the top of the frame allowing suspension by wires from the ceiling or by double-ended hooks. We offer hanging wire kits to make ceiling fixing practical and to offer easy height adjustment. In floor-to-ceiling cable arrays, the Stopper accessory similarly allows for easy height adjustment. This is especially useful for vertical arrays of snap frames, one above the other, such as in shop windows. The frame heights can be readjusted when required, without disturbing the floor to ceiling cables or wires.
Delivery and Returns	• We offer a choice of delivery options tailored to the goods selected and your location, calculated for you automatically in the Checkout. When feasible, you will be offered options for Free, Economy or Next Day delivery. • Any product returned by the purchaser must be unused and in its original packaging, which should be unmarked. If goods are received damaged or faulty we will take care of the problem. • For detailed information about Delivery charges or Returns and refund policies, please click on the links below.
