

Poster Clamps - banner hanging bars

Short Description

- Heavy-duty poster clamps for large banners up to 500micron thick
- Banner hanging bars for long drop displays in large spaces - malls, museums, exhibition halls etc.
- Secure and robust grip for holding heavy banners

Hangers are also designed to accept screw heads for wall hanging

Description

Substantial banner hanging clamps for large displays

For heavy-duty poster and banner hanging, Poster Clamps strongly grip onto most banner materials such as flexible vinyl and fabrics (up to 500 micron thick)

Ideal for displaying heavy banners and posters, these banner hanging bars are simple to use and easy to set up.

- Perfect for ceiling hanging promotional banners and information signs in large spaces
- Robust and secure clamp-and-grip mechanism to hold your banners in place
- Available in 7 standard widths to suit many locations
- Bespoke widths up to 3 metres available – call us for more information
- Use time-and-time again with no loss of grip or tension

If you want to display large banners or posters, our poster clamp hanging banners bars are an excellent choice. A 'big brother' to the very poster Poster Snaps, the bars 'clamp' on to large and heavy materials to provide a secure grip and tension, ensuring even long drop displays look great. Hang from ceilings or on to walls using the strong sliding suspension eyes.

Width of Poster Clamp Extrusion : 30mm

Where can I use my Poster Clamps hanging bars?

Banner hanging bars can be used in a wide variety of places - from home to office or retail to exhibition spaces, wherever you want to hang a large or heavy poster or banner, this is the product for you. Hang from the wall like you would any traditional frame or use the sliding suspension eyes and one of our [hanging wire sets](#) to hang from the ceiling:

- Create interesting and layered window displays
- Make attention-grabbing in-store promotion displays
- Direct customers around your space
- Display information that everyone can see
- Use in the home for wall hangings and large posters

When should I use Poster Clamps?

Poster Clamps are just the thing for grabbing hold of hard-to-grip or slippery material such as vinyl. Also use to secure heavy materials and for tough applications, for example long banners of several metres drop.

Poster Clamps are not really suitable for substrates thicker than about 0.5mm (500 micron). It will be hard to close and re-open the poster clamping bar. Typical banner substrates are 200 micron to 350 micron thick and Poster Clamps are suitable for hanging drop banners of this type.

More Information

Poster Clamp Joiners

Joiners are supplied as a pair allowing two sets of Poster Clamps to be joined together for very large displays:

- Remove the end caps and insert the joiner midway into both profiles
- Tighten the small thumbwheel from the back of the profile
- Ensure that each individual section is properly suspended

Using joiners offers further advantages: minimise damage caused by transit to very long profiles and reduce or avoid over-length carriage charges! Clamping graphics is also easier to achieve in sections and the join is barely visible from the front.

Dimensions of the available sizes are as follows:
Dimensions stated denote the external width of the poster clamp and the physical width of the poster.

	Product Code	Poster Size	External Length	Suitable for
Product Dimensions	PC.42	420mm	426mm	A3 Landscape - A2 Portrait - Folio Portrait
