Description

Stand off panel fixings made from stainless steel

Steel Range. High-quality 304 grade stainless steel, elegant facet appearance. Head is inserted through the panel to be fixed and secured by tightening a grub screw from the side.

- **Stainless steel standoff fixings are priced SINGLY.**
  Please note: as the standoffs are pre-packed in boxes of 4, kindly order in multiples of 4 units.
  4 pieces is the minimum quantity which can be ordered.

Steel 13
13mm diameter head, 15mm stand-off distance from wall. Suits panels from 2 mm up to 10 mm thick. Panel hole size 8 mm diameter.

Steel 15
15mm diameter head, 15mm stand off distance from the wall. 2-11 mm grip range. Panel hole size 9 - 10 mm (to allow for thermal movement or slight misalignment of drilled holes)

Steel 20
20mm diameter head, 20mm wall stand off & 2-11 mm grip range. Panel hole size 9 - 10 mm diameter.

- The best size of stand-off for your project will depend on the visual appearance your require - discreet fixings or larger fittings which make more of a statement. Generally, smaller signs suit smaller fittings and larger signs suit larger head size wall fixings.
- Each box of fittings comes complete with wall plugs, screws, allen key and grub screws.
- Panels should be pre-drilled with holes - normally 4 holes per panels. See Installation section on this page for more information.

Additional Information

More Information	**High quality stainless steel standoff sign fixings for walls** Made from durable non rust 304 marine grade stainless steel, these standoff wall panel fixings are machined to the highest specifications. Unlike some inferior products which can tarnish or corrode, these Italian designed and manufactured fittings add a touch of class to your wall graphics and will last the course. The facetted head is cnc machined in the same Italian city as the famous Italian supercars are made - and to the same exacting standards. Simply put, the quality will not disappoint you.
Assembly and Installation	**Stainless stell wall sign fixings** • The base of each fitting must be screwed securely to the wall. Accurate positioning and drilling is required. • Panels should be pre-drilled with holes - normally 4 holes per mid size panels (at the corners). • Two fixings can be used with narrow strip panels, while extra large panels can require 6 or more stand-offs to ensure the sign remains secure. • For larger panels, please take account of differential thermal expansion between the panel and the wall. This can be allowed for by drilling the panel with slightly oversized holes.
Delivery and Returns	• We offer a choice of delivery options tailored to the goods selected and your location, calculated for you automatically in the Checkout. When feasible, you will be offered options for Free, Economy or Next Day delivery. • Any product returned by the purchaser must be unused and in its original packaging, which should be unmarked. If goods are received damaged or faulty we will take care of the problem. • For detailed information about Delivery charges or Returns and refund policies, please click on the links below.
