## Description

---

### **Silver pedestal sign stand with an adjustable height pole**

Silverline stylish free-standing sign holders comprise a silver coated plastic top-loading A3 or A4 frame supported on an anodised aluminium height-adjustable pole secured by a round metal base with silver paint finish.

- The poster frame can be fitted landscape or portrait.

- Slot-in style top-load frames, for A4 or A3 prints.
- Optional [clear cover sheets](#) available or encapsulate your prints.
- Use single- or double-sided (with two paper prints)
- Adjust the pole height from 1m up to 1.8m as required.
- The flat circular steel base is stable and practical.

The matt silver finish throughout looks good almost anywhere, whether in the office, at a hotel or conference venue, or in an exhibition hall, art gallery or museum.

### Silverline free-standing sign holders

These floor standing poster holders are primarily used indoors but they may be used outside provided that in windy weather a planted tub or other similar heavy object is placed on the base.

- **The round metal base** is made from steel which has been powder coated silver.
- The diameter of base: 250mm.

**The adjustable tube** is fitted with a thumb-wheel clamp to allow height adjustment from 1m up to 1.8m high. The frame is clipped into the silver T-piece.

**A3 or A4 size Silverline frame** can be fitted landscape or portrait. The Slim frame can also be exchanged for another size later. The frame has a slot in one edge so a standard print or laminated sign can be inserted. It is supplied with a correx-type backing sheet. If this is removed a 3mm thick sign substrate such as foam centred board can be inserted in its place.

#### Backing sheet included

Like all our Slim frames we supply a **backing sheet** made from stiff twin-wall fluted plastic generically known as correx. The correx backing sheet serves to stiffen up paper or laminated signs – especially valuable outdoors. For double-sided use simply insert a sign each side of the backing sheet.

#### U-pockets to protect prints indoors

Available accessories include U-pockets – clear thin gauge plastic sleeves plastic to protect paper posters. Note these do not make the sign waterproof and are normally used without the supplied correx backing sheet.

For use outside or in a humid environment always use a laminated paper sign or a sign insert printed onto weather-proof plastic.

The pole, T-piece and frame colour all match. The base is black (charcoal).

#### Spare Parts

Components can be purchased separately if [spare parts](#) are required.
