Description

Chrome sign stand A4 and A3 paper inserts

A practical and economical chrome sign stand is perfect to display printed signs and notices or for in-store price promotions.

The study base and adjustable height pole are made of metal with a shiny chrome finish. The A4 or A3 frames are made from clear virtually-unbreakable plastic. Optional U-shape clear poster sleeves are available separately.

The tall sign-holding stand is stable indoors in freestanding situations. Additionally, the base is flat for use under pallets in cash & carry stores or to display POS above merchandise stacked on the floor in convenience stores. The chrome sign stand is by no means confined to shops and warehouses as a large retail POS stand. It offers a great solution for displaying information at eye level in almost any budget-conscious indoor environment.

Adjustable height sign stand features

- Clear plastic show card frames with T-piece connector - simply pop your printed material into the frame (recommend using the plastic U-pocket). Suitable for two-sided displays.
- Chrome tube, adjustable height 100 cm + frame up to 150 cm + frame, to display at eye level.
- Flat metal base with cut-out for nesting stands to permit compact storage when not in use.
- Bases are designed to slot under stacks of boxes, pallets or other retail merchandise.
- Order optional thin anti-glare U pockets separately - suggested for most printed paper inserts (except for thicker card stock).

More Information

Tall floor sign stands for shops are economical and robust. They are only intended for indoor use – ideal for most retail store types including supermarket floor POS, convenience store product stacks, electrical and houseware retailers, fashion boutiques etc.

- Simple self-assembly.
- 14mm spanner (not included) is required to assemble base to the tube.
- U-pockets are thin plastic (200 microns) folded to make a sleeve into which paper printed POS can be inserted.

ATTENTION: Not for laminated POS

These clear plastic frames will **not** fit encapsulated paper (i.e. A4 or A3 with an extra border).

We have a solution: Free-standing [sign stands for laminated paper](#).

Unlike our popular Slim Frames these clear plastic round-cornered frames do not come with a correx backing sheet and the slot is too narrow to fit one. The maximum POS thickness is 1mm card. Two thinner sheets can be inserted back to back.
