Description

Black free standing floor signs

Sign stands in elegant black finish for all floor standing situations come in A4 and A3 sizes and can be adjusted for portrait or landscape use. These smart black free standing sign or menu stands offer excellent value.

- Your A3 menu or A4 print is securely displayed at a comfortable reading angle at hip height within a smart black snap frame, making it easy to swap signs or menus whenever you wish.

- The frame of the black floor sign stand can be secured in landscape or portrait orientation with a simple locking wing nut behind the frame.
- Protective plastic sheet is included to protect your menu or poster from finger marks etc.
- Easy to assemble sign stands, a spanner is supplied in each kit.
- The snap frame has rounded black corners so there are no sharp corners.
- These black floor standing sign stands are intended for indoor use - see [More information](#)
- The poster frame is displayed at hip or waist height.

Height Port/Land - A4: 1000/950mm A3: 1050/1000mm (approx 3ft 3in)

For a slightly taller alternative (4ft) you may consider our curved leg [menu floor stand](#) or for signs displayed at head height view our full range of [floor sign stands](#).

Many uses for floor sign stands

You can print and insert any printed message you choose - such as 'No Entry without Face Mask' or 'Maintain social distancing'.

Additional details

The design of this black floor standing sign stand is identical to the silver version of our Presenta Eco except that all front facing components are finished in black. The reverse side of the frame is silver/grey - this is not visible when viewed from the front.

Indoor use or limited outdoor use.

Presenta Eco menuboards are not really intended for outdoor use - but they can be used outdoors on calm dry days or used with waterproof printed inserts instead of plain paper. This allows limited outdoor use, for example at open air events, race meetings, golf days etc.

Because the A4 and A3 models share the same size base the larger frame A3 model will be less stable on breezy days - but in normal indoor situations there won't be a problem with stability with either model. The base incorporates a galvanised steel metal plate to create ballast without preventing the sign stand from being perfectly portable if that is required.
