Description

Banner arms are optional accessories for modular InfoColumn

InfoColumn and InfoPole are modular display stands comprising a sturdy base plus 1.8m high pole. In addition to pre-configured kits, we supply components to create your own configuration - or to supplement a standard kit. Banner arm sets enable a drop-banner or vertical flag to be hung from a 'gibbet' arm attached to the central pole or column.

There are two widths of banner arm, 400mm and 600mm. Everything is included to secure your own banner, including a bottom rail which provides weight to keep the banner slightly tensioned.

The top aluminium arm is easily locked in place at the desired height. The integral banner holder includes concealed plastic grippers, which suit all popular weights of banner material - from lightweight flag fabric or paper to thicker 'light-block' grades of vinyl for double-sided display.

- Banner arm sets suit both our modular stands: InfoColumn (chunkier square-profile) and InfoPole (aerofoil-profile).
- This banner arm accessory is supplied without any graphic - the banner or flag, which can be easily fitted and replaced, must be sourced independently.

How to use banner arms

More Information

- Banner arms are an accessory specifically for our InfoColumn and InfoPole display stands. They may not be compatible with other designs of stand as the attachment mechanism relies on there being the right size of channel in the pole.
- With banner arms attached on one or more sides of a column, a hanging banner or flag can be added to attract attention and display an advertising message.
- We offer some stands which already include banner arms. In this case, additional or replacement banner arms can be purchased on this web page.
- While paper banners can be used effectively, we recommend more tear-proof materials in situations which are vulnerable to accidental damage.
- The width of the banner should coincide with width of banner arm selected. The length of the banner (the drop) can be any dimension up to a maximum of 160-170 cm in order to clear the base of the stand.

Easy to fit to InfoColumn

Assembly and Installation

- The top banner arm engages in the channel of the column and is secured by turning the locking device using an allen key (supplied).
- The bottom banner rail hangs loose to provide weight to tension the banner slightly.
- Both top and bottom banner rails incorporate concealed plastic SuperGrips. These grip onto a wide range of banner materials.
- The banner with grips attached is then slid into the banner arm and a black cap is rotated into position to close off the open end.

Delivery and Returns

- We offer a choice of delivery options tailored to the goods selected and your location, calculated for you automatically in the Checkout. When feasible, you will be offered options for Free, Economy or Next Day delivery.
- Any product returned by the purchaser must be unused and in its original packaging, which should be unmarked. If goods are received damaged or faulty we will take care of the problem.
