### Pavement sign with water-fill base

WindPro Plus is a well engineered water fill base pavement sign equipped with double-sided A1 or A0 size poster frames. Smart silver finish, wind resistant and weatherproof poster frame for promoting offers and events on a windy street or forecourt. This heavy-duty pavement signboard is fitted with wheels for easy placement and has features not found in lower cost waterbase pavement signs. WindPro is also available in [black](#).

- The base is fillable with water to make it heavy enough to withstand wind in most situations. A screw-cap is provided for easy filling of the rugged plastic base with water or dry sand.
- The addition of wheels means it is simple to move even when full of water. Just tilt and roll.
- Waterproof snap frames on both sides each incorporate a weather seal to prevent posters printed on paper getting wet. The poster frames also accept thicker inserts than standard snap frames (up to 4mm so a permanent sign panel could also be displayed).
- Poster protector hangs on two mushroom-head pins concealed inside the frame, makes changing posters much simpler.
- Two tacky strips are provided to hold the poster in position while the cover is replaced and the frame is closed.
- Two sets of double-springs allow the frame to deflect slightly to spill strong gusts of wind without the WindPro base lifting or toppling.
- Note: The Ao size Windpro is large and imposing - too large for the average High Street as it is 5ft tall and 3ft wide and cannot fit through a standard doorway. It is ideal for a retail park, garage forecourt or pub car park

## Top of the range waterbase pavement signs

High quality WindPro Plus is a top of the range waterbase pavement sign designed to last outdoors in the elements. If budget is tight, we too have an alternative [low cost pavement sign](#) with wheels but it doesn't have the superior specification of our WindPro Plus.

More Information

### **DETAILS of silver Windpro pavement sign with water-fill base:**

The double-sided poster frame panel is connected to the base by sturdy springs. These springs allow the sign panel to deflect by just the right amount to deflect the wind and prevent the sign toppling or blowing over.

The Ao size model has a larger base to compensate for the large size Ao frame. This makes it impractical to wheel indoors through a standard doorway - a level surface such as smooth concrete or tarmac is recommended for wheeling a large pavement sign. A trolley accessory is available. **Please view Dimensions Tab and check the size before ordering Ao size as it is a very large pavement sign.**

**WindPro** is suitable for medium exposure outdoor situations.

For severe exposure or vulnerable roadside situations consider our heavy duty [Windcheater](#) models.

**Windcheaters** have larger bases than WindPro and other makes of mid duty water-base pavement signs. The additional weight makes them even more stable.

Both have integral wheels for moving the signboard around and a water-proof gasket behind the clear poster cover, making the frame 100% watertight.

#### **WindPro Specifications:**

WPR.A1 - Water fill base pavement sign with wheels | A1

WindPro heavy-duty pavement sign board - silver

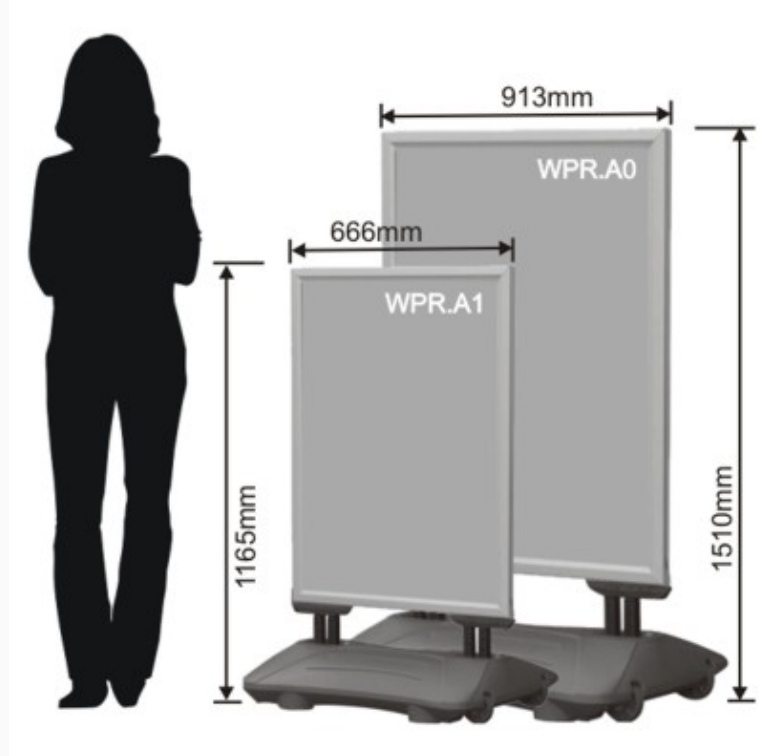

WPR.Ao - Forecourt sign Ao | Large pavement sign board with water fill base for retail store or garage forecourt
