- Upgraded 'Plus' versions with waterproof quick poster change - high-quality European manufactured.

Description

Black weatherproof pavement sign with water-filled base

This superior quality smart black water-fill base pavement sign can be ordered with A0 or A1 size poster frames. Classy black finish combined with a black base. Weather-proof and wind resisting for use on breezy street corners or windy car parks. This model is also known as a Sightmaster Pro in black.

- The sturdy moulded black plastic base should be filled with water to make it stable enough to withstand wind in most situations - filler point and screw-on cap provided.
- The addition of wheels makes it easy to move even when full of water - just tilt and roll. Note that the wheels are for use on smooth surfaces, such as tarmac and not for abrasive surfaces (gravel, stones etc)
- Waterproof snap frames on both sides each incorporate a weatherproof gasket to prevent standard paper posters from getting wet. These special snap-shut frames accept thicker inserts than standard snap frames (up to 4mm) in addition to regular posters.
- The WindPro design features safe rounded corners for both the poster frame and base. The A0 version is large - 5ft tall and 3ft wide - too big for a restricted pavement and heavy to move when filled with water.
- Two sets of double-springs allow the frame to lean over slightly to spill strong gusts of wind without the WindPro base falling over.

A1 wind-resistant pavement sign - WindPro

- A1 Outdoor waterproof pavement sign with high-quality waterproof snap poster frame Black painted finish
- Heavy waterbased sign holder with wheels for easy placement.

More Information

DETAILS of black pavement sign with water-fill base:

The double-sided poster frame board is connected to the base by sturdy springs. These springs allow the sign board to deflect by just the right amount to deflect the wind and prevent the sign from toppling or blowing over. The A0 size model has a larger base to compensate for the large size A0 frame. This makes it impractical to wheel indoors through a standard doorway. Note that the wheels are for use on smooth and level surfaces such as smooth concrete or tarmac. The wheels are not for use on abrasive surfaces such as gravel, grit and stones.

Please check the Dimensions Tab before ordering A0 size as it is a very large pavement sign.

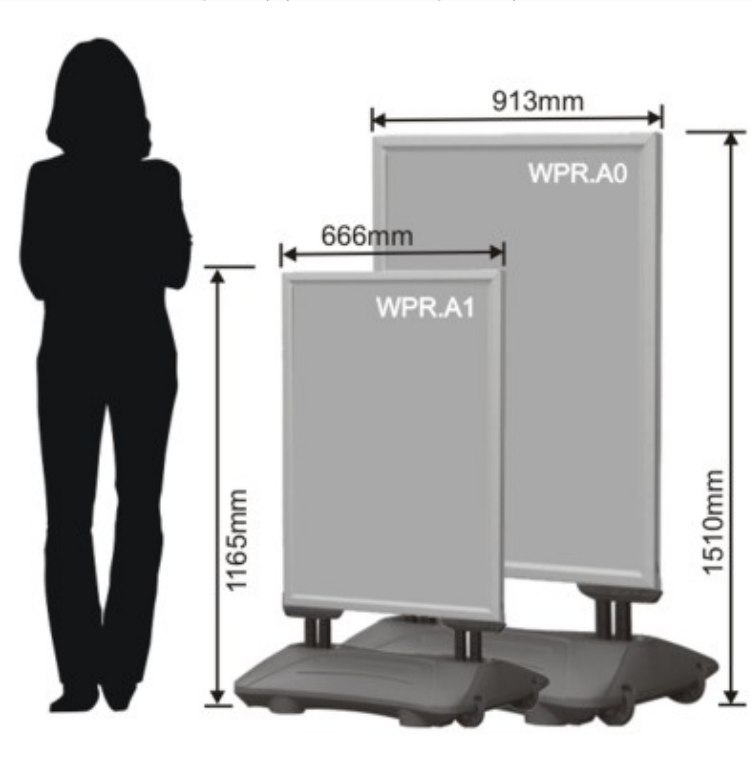

A trolley accessory is available.

Product Dimensions

Dimensions:

A1 model 1165mm (46") high x 720mm (26") wide (Poster size: 841mm x 594mm) (Base 720 x 530mm)
