Description

Outdoor waterproof brochure dispensers – outdoor leaflet holders

Outdoor leaflet holders are an excellent tool for marketing your business, service or attraction. Fast food outlets use weatherproof dispensers to distribute take-away menus. Outdoor leaflet dispensers are also useful for giving out information leaflets when staff are not available or the premises is closed.

Displaying leaflets and menus outside

Three sizes of Taymar leaflet dispensers are available – with optional clips to hang on a van or car window. Ideal for displaying brochures and leaflets outdoors, this injection moulded clear plastic brochure box is made from a weatherproof rigid material.

The outdoor brochure dispenser resists water penetration having an integral lid. The hinged lid self-closes after your leaflet or flyer has been removed. Available in A4 size, A5 and DL size (to suit 1/3rd A4 paper and popular tri-fold literature such as tourist brochures and take-out menus).

- Economical outdoor leaflet container will help keep brochures acceptably dry in most exterior situations. Drainage holes in underside allow water which penetrates or condensation to drain.
- DL size fits small leaflets 4" wide by 8" high (99mm x 210mm). A4 and A5 Taymar outdoor leaflet holders fit standard A4 brochures or A5 flyers.
- Fixing holes in the back of the unit allow the unit to be screwed or cable-tied onto posts or railings. (*Screws/cable-ties not included*).
- The DL size has two sets of screw holes. It is easier to screw the bottom screws in first and then slide the holder onto them.
- Also available complete with special clips to hook over the window of a car or van (for use when stationary) – attaching outdoor brochure holders to a vehicle is a great way to promote any business or event. Select version with Hanging Clips (/HC)

More Information	<p>Car window clips – supplied with brochure boxes where hanging clips are mentioned (/HC). Optional clear plastic clips slot into the back of Taymar outdoor brochure holders enabling easy display of leaflets or flyers on a car window or on a service van. The window must be slightly lowered so the car window clips can lip over the glass – the window is then raised to pinch the clip and secure the brochure box. Please note we cannot guarantee compatibility with all vehicles. The car or van should not be driven with brochure box attached. A similar outdoor business card holder is also available.</p>
