Description

Chalk pens for blackboards and whiteboards

These chisel nib chalk pens for blackboards and whiteboards are a must-have for your sign making kit. The 2mm-6mm chisel nib lends itself perfectly to producing different sizes and widths of line meaning one pen can be used for multiple finishes! The liquid chalk pens can be put to brilliant use on menu and specials boards or around the home – try using them on chalk paint walls in the kitchen or kids' bedrooms. The beauty of these pens is that a damp cloth will wipe the ink away.

We only stock chalk pens of the highest quality so you can be certain that once you've allowed the ink to dry, your design will be fade and smudge resistant.

Choose your colour and enter the quantity – repeat for different colours

Best colours for blackboards

- White, yellow, pink, light blue, orange, gold, silver and green

Best colours for whiteboards

- Black, red, violet and green

More Information	<h3>Wet wipe marker pens are easy to use and erase</h3> <p>Wet wipe the ink away with a damp cloth or the Securit pen cleaner spray to thoroughly clean the chalkboard surface. These pens are easy to use and easy to clean making them a vital addition to your sign making kit.</p>
Assembly and Installation	<h3>What if the writing doesn't clean off with a damp cloth?</h3> <p>Chalkboard surfaces differ – some are very resistant to leaving shadow marks while others (especially cheaper surfaces) tend to absorb a certain amount of ink which can leave faint shadows. In this case we recommend you try Securit Cleaner which come in a handy spray bottle. Generally it deep cleans the surface and soaks away more stubborn marks.</p> <h3>Before using the chalk pen</h3> <ul style="list-style-type: none">• When shipped the pen nib is dry – it needs priming. First shake the pen repeatedly to make sure the ink is well mixed.• Next pump the nib repeatedly on a piece of scrap paper to get the ink flowing. This can take more than a minute, so be patient.• Make sure whatever you are writing on is totally clean and dry. Invisible greasy marks are the enemy of chalk pens.• Whenever possible write on a flat surface to stop the ink running. Allow the ink to dry, especially before introducing a second colour.• For more complex designs pre-planning and using ruled pencil guidelines will pay dividends
Delivery and Returns	<ul style="list-style-type: none">• We offer a choice of delivery options tailored to the goods selected and your location, calculated for you automatically in the Checkout.
