## Individual LED Numbers

## Description

---

**LED Numerals are sold individually.** They can be combined with [LED letters](#) to create the custom LED sign of your choice.

LED Numbers form part of our LED Alphabet family. The individual letters and numbers simply plug together joining adjacent letters both electrically and mechanically.

- **Optionally select a Flasher unit** - position this at the start of the phrase to make the whole sign flash on demand - or position it mid way between two words in place of a Spacer. The letters to the right of it will then flash.
- **Remember to add a [Power Supply Unit](#) (PSU)** which will power up to 18 letters or numbers.
- **Complete the order with a [Suspension Kit](#)** we offer a choice to suit your particular situation. These LED signs are for use indoors or in shop windows etc.

**In stock now for immediate despatch!**

More Information	<p><b>IMPORTANT</b> Please plan our your message carefully and ensure you order ALL the letters and numbers you need - including spaces. We only see a list of letters when we process your order. We have no way to tell what message you plan to create, so we cannot spot mistakes or omissions - so please double-check! LED Letters and Numbers will only work if you also order a Power Supply Unit (PSU) with the special connector required to connect to the first LED Letter in your message. Please view the video!</p>	
	<p>LED Numerals are available in red colour only. They are not suitable for outdoor use. LEDs are considered economical to run and have a long service life. The width of letters and numbers varies (depending on the individual character) but as a guide please allow 100mm (4") width per letter, spacer or flasher unit. Up to 18 letters or numbers can be joined together including any on a second row if a single power supply is to be used ('second row' cable required in this case). Various mounting accessories are offered. We cannot know your individual situation so can only give general guidance on which fixing accessories you might need. It is up to the purchaser to ensure that they have a suitable 13 amp socket outlet available to plug into. The PSU is rated at 2 amps. The power consumption per letter is approximately 0.1 amp.</p>	
Delivery and Returns	<ul style="list-style-type: none"><li>• We offer a choice of delivery options tailored to the goods selected and your location, calculated for you automatically in the Checkout. When feasible, you will be offered options for Free, Economy or Next Day delivery.</li><li>• Any product returned by the purchaser must be unused and in its original packaging, which should be unmarked.
