### Large format printer paper on rolls - indoor

Indoor prints can be produced by printing on the following types of specially coated roll paper. Ideal for use with pigment inkjet printers such as Epson, Canon and HP.

- **Matt Coated Paper**, 160 micron thick matte paper with a coated photo finish. Economical roll paper for indoor posters and hanging banners. Can also be used for indoor prints where expensive media is not required. Note: this indoor media is not waterproof and can be ripped. Due to the thickness this paper accepts a high ink load without bleed through great for indoor POS printing to a budget.
- **Glossy Photo Paper**, Beautiful glossy paper for photo quality prints. When you need a photographic finish this 42 inch roll paper will deliver high quality output worthy of your prized photographs. This 200 micron paper can curl so is best used in a frame - for example in [Ao snap frames](#). Exception print quality can be achieved using gloss paper, when the advertised product is high-end use eye catching high resolution graphics to attract more sales.

### Specialist large format media suppliers

Sign-holders.co.uk have specialised in large format printing for many years and only select the best media manufacturers for the demands of indoor and outdoor point of sale printing in-house by retailers. Using roll paper is considerably cheaper than cut sheets.
