

Snap frame replacement plastic covers

Short Description

- Replacement snap frame poster covers with anti-glare side to reduce distracting reflections
- Flexible plastic 500-micron anti-glare cover sheets for snap frames
- Poster protectors are made from outdoor grade PET (similar to PVC but better quality)

Description

Replacement covers for snap frames

Replacement covers for snap frames are also known as poster cover sheets or poster protectors. These high quality plastic sheets are suitable for most types of snap frames as replacement covers. They are suitable for regular snap frame pavement signs which do not have a waterproof gasket (most snap frame [A-boards](#) and [budget waterbase signs](#)).

Important Notes:

- Snap frame replacement covers are supplied pre-cut to specific sizes. Please check dimensions carefully before ordering.
- These cover sheets have a non-reflective side and a glossy side. Usually the anti-glare side is inserted facing outwards, but the choice is yours.
- Typical thickness is 500-micron (larger sizes are slightly thicker). This is only half a millimeter thick and therefore flexible (not rigid) to enable replacement snap frame covers to be flexed into the frame..
- Made from outdoor grade PET (similar to PVC sheets but better quality and recyclable at end of life). Poster covers are sometimes referred to as acetate sheets by people who remember overhead projectors.

Attention: Covers for waterproof snap frames are slightly larger!

Waterproof snap frames use a slightly bigger all round poster cover that presses onto a watertight sealing strip.

If your snap frames have a black rubber strip around the inside of the frame the covers on this page will be too small.

Click on the links below for more details of these replacement poster covers for waterproof snap frames and waterproof lockable snap frames. Waterproof snap frames and snap frames for higher quality water-base pavement signs with a rubber gasket within the frame require special over-size faces.

Additional Information

If the snap frame has a black foam rubber strip within the frame surrounding the poster these covers will NOT BE SUITABLE. [Click here for oversize covers.](#)

NOTES

Cover sheets protect paper prints but they do not render the frame waterproof. They are specifically intended for use with aluminium snap frames.

These thicker grade poster protectors can also be used with slot in style frames such as Woodline and Alu profile frames. For plastic slot-in frames such as Slim Frames the additional thickness combined with a Correx backing sheet can limit display to single-sided only. We therefore recommend the thinner poster protectors intended specifically for such frames.

These clear plastic faces have one gloss side and one anti-reflective side. Normally the anti-reflex side faces the front to help prevent spurious reflections and glare.

However if you prefer a gloss front face the plastic sheet can simply be turned over.
