Description

Chalk card inserts- Plastic

These are low-cost plastic write-on inserts which can be used with snap frames or slot-in style poster frames. They are suitable for writing on with liquid chalk pens such as Posterman (outdoors) or Illumigraph (indoors). They can be re-used a number of times - see details.

- Flexible 400 micron PVC material intended for use within a poster frame. (Smallest sizes can be used without a frame - for example with a [card holder](#) or [card gripper](#)).
- Sold in pack quantities as stated in the pricing grid. Price is per pack.

- Surface resembles a blackboard and when written on with chalk pens writing can be erased.
- Do not use behind a plastic cover sheet (especially in sunlight).

Important NOTES

Chalk cards can be erased as follows:

Posterman pen - erase with Posterman Cleaner (and certain household cleaning products).

Illumigraph pen - can additionally be erased with a damp cloth.

After correct cleaning there is usually little, if any, residual shadow left by pens but writing left on the plastic for a long time can be harder to erase and after repeated cycles the surface may deteriorate and the card require replacement.

Chalk cards are NOT intended for use with real chalk.

They are not true blackboards but they can be used to give a blackboard effect when inserted into a suitable frame.

Sizes up to A5 can be used frameless when used with the correct clip.

Chalk cards are a consumable item with a limited life especially in some harsh situations. In particular larger sizes should not be exposed to strong direct sunshine as they can distort at high temperatures. They should not be used outside behind poster cover sheets to prevent them from baking. The chalk cards themselves are waterproof and are fine exposed to the elements when used with Posterman chalk pens.
