### **Clear counter top display frames with upright support feet**

These clear counter top display frames with upright support feet are an excellent choice for budget-conscious buyers. These plastic menu holders are strong, stable, and can display your information, menus, notices and POS either single- or double-sided.

Our countertop display showcard frames are designed to accept one or two printed pieces of paper or a 2mm

printed board, unlike the Green Magic Slim frames that have a backing sheet and accept laminated pieces of A4 and A5 paper. The clear showcard frame is best suited to indoor applications although if using waterproof printed signs can be used in a covered outdoor location.

- Best suited to indoor applications
- Clear border frame gives a neutral colour and less distraction from the product advertisement
- Available with adjustable height stands. [Click here for details](#)
- Next-day delivery options at checkout from our large UK stocks.

We recommend that you order thin plastic U-pockets to protect your paper inserts - see Recommended Accessories.

## I'm looking for the best outdoor POS sign holders

Green Magic Slim frames have been the POS sign holding frame of choice for many outdoor retailers for years to see [the range click here](#)
