- Stable and strong plastic support feet to angle the sign for lower-level displays

Product Images

Description

Clear plastic showcard frames with angled support feet A4 and A5

Clear plastic showcard frames with see-through borders suitable for single-sided indoor prices and product information displays with angled support feet that clip onto the frame edge give the information a better viewing angle if the frame is positioned lower than hip height.

We recommend these frames are used in conjunction with thin clear plastic U-pockets to protect paper prints.
