

## Silver Bee-Line hook self locks onto wire

### Short Description

- Bee-Line hooks are intended for use with our suspended cables for hanging many different items
- Height adjustment is easy thanks to the finger tip push button to release the gripper mechanism
- The straight cable path means that a number of hooks can be used on a single wire - multi-tier

## Description

---

### Versatile and economical adjustable suspension hooks

Silver colour hooks have a bright nickel plated finish. The Bee-Line hook self locks onto wire and can be adjusted using the release button where the cable enters the fitting. The hook has a safe working load of 17 kg with a 5:1 safety factor which is highly advisable for suspended products.

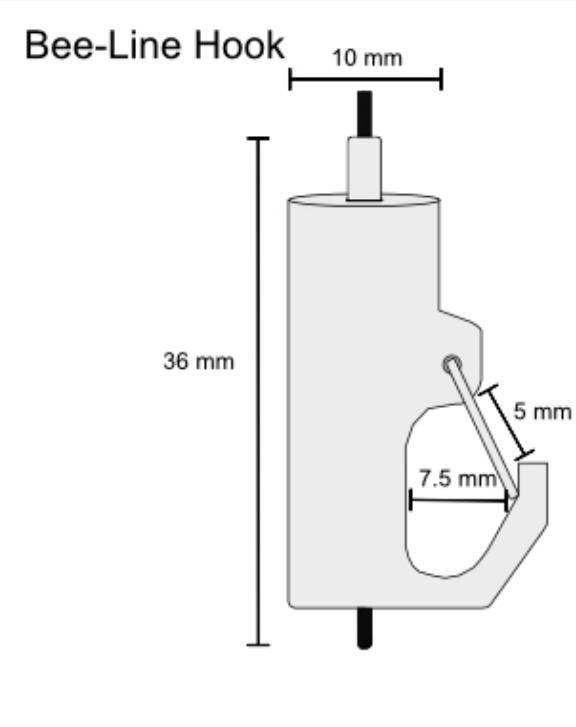

The hook is quite petite - just under 4cm high [37mm (1-1/2")]

The cable passes straight through the hook. It can be cut off flush with the bottom of the hook or a short tail can be left for further fine adjustment (which is recommended). Alternatively more hooks can be threaded on a single cable - a useful feature for art shops where several different size pictures or paintings need to be displayed one

above the other. The hook is so versatile – to reset the height takes seconds.

We recommend these hooks are purchased with one of our standard hanging wire sets or with other components from our range. The hook works best on 7x7 1.5mm diam galvanised wire rope. It can be used with most wires between 1mm and 2mm thick but we recommend testing thoroughly if using your own wire, and our SWL ratings will not apply as they are based on laboratory tests using our own cables.

# Additional Information

More Information	<ul style="list-style-type: none"><li>• The Bee-Line Hook fitting itself is capable of holding up to 17kg.</li><li>• The 1.5mm galvanised wire (7x7 construction) will carry these loads safely. However, some ceilings may not take such loads without reinforcement or the use of specialist fixings in place of the screws and plastic plugs supplied with our regular kits. If in doubt please consult a skilled tradesman or professional.</li></ul>
