

Outdoor hand sanitiser station

Short Description

- Outdoor hand sanitiser station free-standing made from sturdy steel, fitted with wheels
- Outdoor stand with hand sanitiser dispensers - lever action dispenser or bottle holder bracket
- Choose models with either A3 or A4 poster frames to customise your exterior grade sanitiser stand

Description

Need to position a hand sanitiser stand outside?

Outdoor grade hand sanitiser dispenser stand is perfect for use outside. The sturdy stand fitted with wheels and all accessory options are weatherproof.

Outdoor hand sanitiser station is available with two dispenser options - an elbow operated lever action dispenser supplied with refillable bottle or a bottle holder bracket to take your own pump-action hand sanitiser bottle. Hand sanitising gel is not included but can be ordered separately.

Exterior grade hand sanitiser

Intended for external use, the stand is robust weighing in at around 12 kg. To make it portable wheels are fitted at one end with a carry handle at the opposite end. The dispenser unit or bottle holder bracket can be fitted at any convenient height making the outdoor sanitiser station accessible to children or wheel chair users. The overall height is 1.5 m.

The bottle holder is supplied with velcro straps to secure your bottle of sanitiser gel. The lever operated dispenser has a 1 litre pump action reservoir which can be removed for refilling by depressing a security catch (to deter theft of sanitiser gel).

Integral outdoor poster holder

The outdoor sanitiser station comes with a choice of A3 or A4 poster frame, which can be fitted portrait or landscape. The outdoor poster holder has a waterproof seal to take your own printed paper poster. A custom sign referencing your church, school, restaurant or business can be used to welcome visitors and encourage them to sanitise their hands.

Where to use outdoor hand sanitiser stands

There are many situations where it is advantageous to position a hand sanitiser stand outside. This is especially

true when the whole stand can easily be wheeled indoors when there is no one around to avoid abuse or tampering. Hand sanitisers can be placed outside the entrance to schools, in open air public spaces, sports grounds and at outdoor events. Free-standing hand sanitiser stands are perfect when there is no convenient wall location for a dispenser or when old stone walls should not be drilled into or damaged.

An outdoor hand sanitising station is especially valuable at any location where there are no alternative hand washing facilities – such as outside churches, at farmers markets or adjacent to street food vendors or take-away restaurants. As a public service hand sanitising stations can be placed in high streets, outside a pub or restaurant or within a university campus ... and in many other locations.

More Information

More about the outdoor stand

The base and pole are both made from steel and coated with a tough weather-resistant paint to ward off the weather. To prevent chips which could initiate rusting the steel base is protected from direct contact with the ground by plastic wheels at one end and rubber protectors at the handle end. To use the wheels to move the stand, simply tip it onto the wheels and pull it along. Over rough surfaces and up steps the stand should be lifted and carried.

How stable is the stand? In normal breezy conditions the stand will not blow over. However in strong winds there is some risk of the unit blowing over, especially when the larger A3 frame is selected as the 'sail' area is greater. It is therefore recommended not to put the stand out when gales or storms are forecast. Alternatively, position it in a sheltered doorway avoiding locations such as alleys prone to turbulent eddies.

More about the poster frame

The stand also serves as an outdoor sign holder as it benefits from a waterproof snap frame fitted above the dispenser.

This header attracts visitors' eye and is useful to encourage use of hand sanitiser gel applied to the hands.

Unlike a regular snap frame, these premium quality poster holders include a weatherproof seal within the frame. The poster cover sheet seats onto this seal creating a waterproof 'capsule' to prevent your poster from rain and spray. (Note: Occasional condensation can occur due to atmospheric conditions - as with car windscreens - and this is not a defect).

Generally posters or notices are printed on customers' own desktop printers and inserted into the waterproof snap frame from the front without needing to remove the frame from the stand. If the print fades or needs updating it can be exchanged with ease.

More about the dispenser options

The lever arm dispenser is popular and easy to use. It can be operated by the elbow if the user prefers to avoid direct contact. The dispenser casing is made from outdoor grade ABS. The gel bottle and pump unit are also suitable for outdoor use - and replaceable. The 1 litre capacity bottle is supplied without gel. To remove it for refilling there is a security device to be released - either by unscrewing or depressing a catch (depends on model in stock).

If the bottle holder bracket is selected, we supply a shelf bracket designed to take several size of pre-packed sanitiser gel bottles. Popular sizes are 750ml and 1 litre. An empty refillable pump action bottle can be ordered from us as an optional extra - click [refillable bottle](#).

Assembly and Installation	<p>Assembly instructions are supplied</p> <p>The metal pole is bolted onto the base using bolts supplied (together with a wrench to tighten). The dispenser or bottle holder and poster frame are also fitted with smaller bolts at the required height using the slotted apertures provided in the upright leg.</p>
Delivery and Returns	<p>Free delivery for all models to UK Zone 1</p> <ul style="list-style-type: none"> • We offer a choice of delivery options tailored to the goods selected and your location, calculated for you automatically in the Checkout.
