Description

Desk screen clamps make installation simple

Edge clamp kit for fixing table edge screens make it easy to attach a social distancing screen to the front or side of a desk or table. Supplied as a pair, these table edge brackets offer a simple, economic and secure way to attach a pre-cut perspex screen to the edge of a table or desk whenever a clear protective screen is required.

Provided the table has a minimum overhang of 50 mm (2 inch) the clamps can be attached to most tables or desk

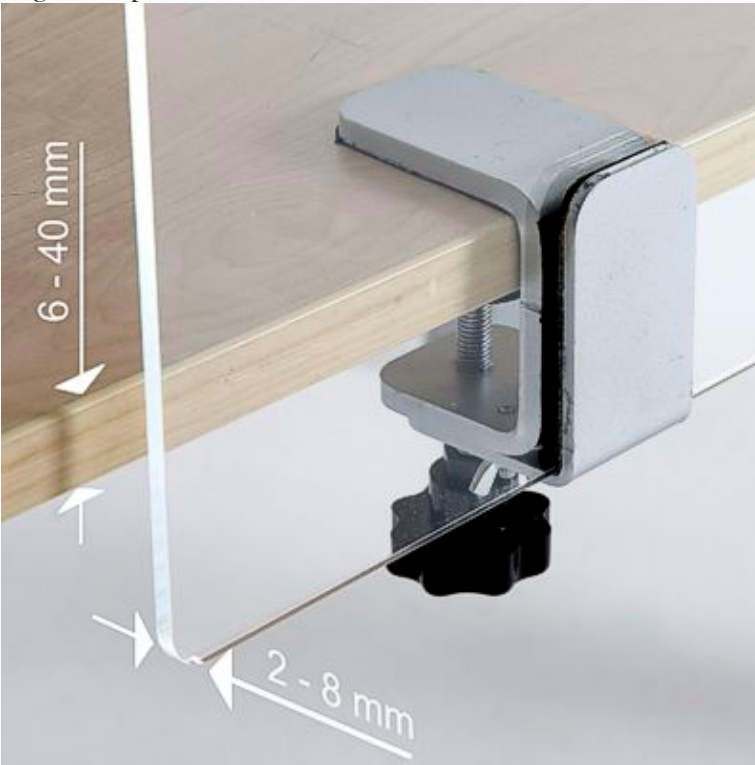

tops up to 40 mm thick. The desk screen clamps suit any thickness of clear, frosted or solid panel from 2 mm up to 8 mm thick. The panel is not included in the kit – the width of the screen will vary according to the size of the desk or table. The height of the panel will depend on individual customer's requirements – taller screens also need to be thicker to provide sufficient rigidity. We recommend that screens should be manufactured with radius corners for safety reasons.

Versatile table edge brackets

- No drilling is required – the sturdy table edge brackets are coated internally with EVA foam to hold panels securely and prevent scratching of rigid plastic or toughened safety glass screen dividers.
- The clamps can be removed or relocated whenever required.
- Edge clamp are made from sturdy steel with a durable silver-grey finish.
- The desk screen brackets are suitable for use on office desks, reading tables, work benches, in classrooms, cafeterias, pubs and restaurants to help prevent airborne virus transmission, especially from coughs, sneezes and accidental spitting when speaking or laughing.
- These perspex screen fixings are also suitable for installing a sneeze screen to the front of certain styles of checkout or payment counter in shops. The clamps can also be used with Plexiglass and toughened safety glass screens.
- Volume pricing is available for shop fitting manufacturers and acrylic fabricators requiring these versatile fixing brackets for their projects.

We have a different clamping system for use when a screen or panel is required to go across a table or desk, rather than along the edge.

Additional Information

More Information	<ul style="list-style-type: none">• Edge clamps are priced per pair• A pair of clamps is required to fix one screen• The size of the panel should be determined taking account of the location and potential for rough handling. In a normal office situation 120 cm wide screens should prove satisfactory.
Product Dimensions	<ul style="list-style-type: none">• Please refer to the diagram below which illustrates the range of table and panel thicknesses which can be used with the Edge Clamp
