## Description

---

### **Touch free gel dispenser with smart tabletop stand**

Touch free automatic gel dispenser is supplied with a purpose-designed white metal table stand. The unit is perfect for standing on a table, desk, bar, counter or reception desk. In most situations this automatic tabletop hand sanitiser dispenser is used free-standing or it can be bolted down (two holes are provided). When used outside it is recommended that the stand is screwed to a tabletop.

Automatic hand sanitiser dispenser has 1000 ml (1 litre) capacity and can be refilled with any make of sanitiser gel (not liquid alcohol). We can supply good quality 70% alcohol gel with certified virus and germ killing properties. The hands-free unit dispenses approximately 2000 measured doses between refills. It is battery

powered: the four AA batteries are not included – standard alkaline AA batteries will last many months before needing changing (in excess of 20,000 shots).

Automatic hand gel dispenser with table stand is suitable for use in any environment ranging from schools to offices, from serving counters to reception desks. The tabletop stand is perfect when there is no suitable wall to mount a dispenser and a floor standing model might impede access.

This unit has been tested outdoors over a number of weeks in inclement weather without displaying any adverse performance. Outdoor sanitiser units are perfect for open air events such as festivals. We also offer an outdoor automatic hand sanitiser without stand where there is a convenient wall of post to screw the unit onto.

See links below for other hand sanitiser dispensers which we offer.

## Additional Information

More Information	<b>Refilling is easy</b> Refilling the touch-free dispenser is straight-forward. The housing is opened with a push-in key. Simply take out the reservoir, remove the top bung and pour in gel with the help of a funnel or a jug with a spout to help avoid spillages.
Assembly and Installation	<b>Assembly is easy</b> The stand and the dispenser are packed separately with screw fixings to attach the dispenser to the table stand. We do not provide bolts or screws for securing the stand permanently to a table as the appropriate solution will depend on what you are fixing to. The table stand can be used simply stood on the table in most indoor situations.
