## Description

---

### Foot operated hand sanitising station

This robust metal hand sanitising stand benefits from a foot operated hand sanitiser dispenser. Pressing down on the foot pedal dispenses a measured amount of hand sanitiser, without needing to touch the dispenser. The foot pedal pump-action hand sanitiser does not require an electrical supply as the operation is mechanical: a clever, reliable and professional looking design.

The foot operated hand sanitiser station has some great additional features:

- The 1 litre capacity dispenser unit can be refilled with any brand of hand gel (we recommend our own 70% alcohol hand gel supplied in economical 5 litre plastic jerry cans – see Recommended Accessories).
- The dispenser unit is easily adjusted in height and locked in position using two knobs on the back of the metal stand. The dispenser height can be adjusted from 970 mm up to 1225 mm.
- Our foot operated hand sanitiser is therefore equally suitable for adults and children of all ages, from nursery through to primary school and secondary school.
- The stand is constructed from galvanised steel which is powder coated and is weather resistant to use outdoors – for example on the street, at a bus or train station or at a park or recreation ground. The dispenser unit is made from sturdy ABS plastic. Spare [pump action hand sanitiser bottles](#) are available.
- The dispenser housing includes a sprung security catch to deter unauthorised removal of the dispenser bottle.
- The stand is equipped with a pair of wheels – once tipped at an angle the mobile dispenser stand can be rolled along, for relocating the foot operated hand sanitiser or wheeling in at night.
- The dispenser nozzle is conveniently angled downwards to direct gel into the hands and avoiding spillages. A plastic drip catcher tray is provided, which can be unclipped for cleaning.
- The standard paint finish is silver. We can offer a black painted version to special order (please call to check availability).
- The stand can easily be branded or have custom graphics applied by your local sign company.
- Because the steel stand has a flat front it is receptive for use with [A4 magnetic poster pockets](#) which we can

supply as an accessory. This offers an opportunity to convey your personal message, or rotate hand sanitising posters created in the classroom.

## Additional Information

More Information	<ul style="list-style-type: none"><li>• 100% hands free hand sanitising to assist in infection control. We also offer <a href="#">automatic hands free hand sanitiser stands</a>.</li><li>• The dispenser bottle can be refilled easily.
