# Poster hanger suspension kit for flat ceiling

## Description

### Flat ceiling suspension fixings for poster displays

These commercial grade flat ceiling suspension fixings are suitable for displaying posters in retail, office, and exhibition environments. The flat ceiling suspension kit is engineered to safely hold a 15kg vertical load. As most hanging posters will only weight 1-2kgs including the aluminium poster bars, you can be confident that your hanging displays will be secure and robust!

Each kit contains:

- 2 x commercial grade ceiling anchors with height adjustment mechanism
- 2 x 1.5mm dia wire ropes 100cm long with end terminations

<https://www.sign-holders.co.uk/hanging-posters/poster-snaps-and-clamps/flat-ceiling-suspension-kit-for-poster-fast-and-poster-clamp.html>

- 2 x screws and wall plugs

Use this wire hanging kit to screw the top anchor fitting to a traditional flat ceiling and thread the wire through the hanger on the poster bar and up into the ceiling anchor. Please ensure that the ceiling fixing is securely screwed ideally through the plasterboard into one of the wooden roofing joists.

If in doubt please ask a qualified tradesman.
