- Strong stable pole and base suitable for high traffic indoor spaces, public buildings etc.
- Easy to attach any length drop-banner - bottom gripper bars are included

Description

Introducing Our Double-Banner Display Stands

Designed to provide a sturdy and stable platform for suspending twin advertising banners, our double-banner display stands are perfect for use in high foot-fall areas, such as malls, exhibition stands, universities, and public buildings.

- Choose between two banner arm widths, 400mm or 600mm
- Floor-standing display stand with twin height-adjustable banner arms
- Complete with gripper rails to ensure banners hang straight and don't curl
- Print banners single-sided or double-sided, with any drop length up to 160 cm

Our versatile banner grippers work with traditional banner media as well as printed flag media, and the included SuperGrips ensure a secure grip on your drop banner inside the protruding support arms. You can even use this stand double-sided if your banner is printed on media that doesn't show through.

Assembling this 1.8m high banner stand is a breeze with all the necessary tools included. The stand is strong and sturdy, weighing in at 15 kg when assembled, making it more reliable than some roll-up banners that can topple over. Please note that this twin banner stand is recommended for indoor use or under sheltered covered entrances.

Our banner stands are made from durable, heavy-grade aluminium that is also recyclable, ensuring both durability and environmental responsibility. Additionally, depending on the height of your banners, you can also add leaflet dispensers that attach to the pole in the same way as the banner arms, making this one of the most robust and versatile banner stands on the market today.

While we do not currently offer a banner design and printing service, banners and large format prints can be sourced from many printers and sign companies, either locally or online.

More Information

How do I attach my banners to the banner stand?

Attaching banners to the stand couldn't be easier! Just follow the steps below:

- Slide open the black endcap on the banner arms and remove the poster grips
- Attach the grips to the top and bottom of the banner
- Carefully slide the poster grips back into the banner arm and close the black endcap
- Only the top banner arm is attached to the pole. The bottom arm is to add weight to the banner so it doesn't curl.

How do I attach brochure boxes to my banner stand

Attaching leaflet holders or brochure dispensers is also easy: the pole has 4 different channels you can use. First, decide if you want a leaflet at the side of the banner or underneath. Gently slide the brochure dispenser down the channel and tighten the Allen key lock once at the required height.

Can I use this banner stand double-sided?

Yes, you can get banners printed double-sided. Alternatively, you have to line two banners up, back to back, and slide the poster grips onto both.

Assembly and Installation

Assembling the banner stand is easy and should take just a few minutes - you will need the Allen key tools included and follow the assembly instructions provided.

Build the base and pole unit and slide banner arms onto the pole. All of the components are height adjustable so choose the banner heights to suit you and tighten the allen screws to fix the banner arms in place.

If you have purchased brochure dispensers, slide them down the pole first, then attach your banners, everything is adjustable to suit your needs.

Once assembled, the whole unit can be moved 'as is' or can be dismantled again. The product is best suited to more permanent situations but the banners can be changed as often as required to suit new promotions.

Please contact us if you have issues with building your stand - we're always happy to talk you through the steps.

Delivery and Returns	<ul style="list-style-type: none">• We offer a choice of delivery options tailored to the goods selected and your location, calculated for you automatically in the Checkout.
