More Information

A3 Silver frame surround

Our A3 silver frames feature a 25mm surround – the most popular profile for snap frame poster holders in the UK. We stock a great range of frames with this size surround so you can mix and match your poster holders for a cohesive and dynamic look.

A3 Clip frames

Snap frames are sometimes called clip frames but don't confuse these excellent quality, professional-use frames with the popular but lower-quality home-use poster frame with a hardboard back and clips. Our A3 silver frames are perfect for hospitality and events venues for promotional posters where displays are regularly updated. Of course, these frames are great for home-use too!

Size Information for Aluminium Snap Frames

- The width of the surround is 2.5cm = 25mm or 1 inch
- Front-to-back depth of 25mm profile snap frame: 12mm (approx 1/2 inch)
- A3 relates to the size of paper an A3 frame will fit.
- A narrow strip around the edge of your print is hidden when the frame is closed.
- Visible poster size: 22mm less than actual poster (i.e. 11mm all round your poster is hidden by the frame surround)
- The overall size of the frame is larger than the paper inserted.

Overall (external) frame sizes are shown in the table:

Table of standard snap frame sizes – relates to 25mm wide profile frames

Product Dimensions	Paper Size	Poster size	External size	Visible area
	A5	148x210	177x239	126x188
	A4	210x297	239x326	188x275
	A3	297x420	326x449	275x398
	A2	420x594	449x623	398x572
	A1	594x841	623x870	572x819
	20.30	508x762	537x791	486x740
	B2	500x700	529x729	478x678

SPECIAL SIZES

Other special sizes can be made to order. Custom sizes cost a lot more than stock sizes unless the quantity is more than 50 frames. Please get in touch if you require special-size snap frames.

Assembly and Installation

Fix snap frames using screws

- The best way to permanently fix snap frame is with screws.
- Screws and plastic wall plugs are included with every snap frame we supply
- The wall plugs are for use with masonry walls such as brick and most plastered walls
- When screwing onto wood the plugs are not needed
- A power drill and screwdriver are required for screw fixing (and we recommend using a spirit level and tape measure to ensure the frames are properly aligned). If in doubt please consult a proficient DIY or trades person.

Fix snap frames using adhesive tape

- Rolls of double-side adhesive tape are available as an accessory item.
- If **double-side adhesive tape** is used to fix frames (in place of the screws supplied) please check the smoothness and suitability of the wall.
- Tiles and similar surfaces may be suitable provided they are cleaned thoroughly before application.
- Tape fixing is not suitable for surfaces with a non-stick coating or porous/foamed surfaces.
- We recommend that tape is used around the full perimeter of the frame.
- Larger frames are normally best screwed. A residue of foam tape will be left on the wall or door after removal of the frame and the frame will usually be hard to get off.

Delivery and Returns

- We offer a choice of delivery options tailored to the goods selected and your location, calculated for you automatically in the Checkout. When feasible, you will be offered options for Free, Economy or Next Day delivery.
- Any product returned by the purchaser must be unused and in its original packaging, which should be unmarked. If goods are received damaged or faulty we will take care of the problem.
