- Short and long clips perform very similar function
- Sold in pairs

Description

Suspension Clips for Slim Frames

Clear polycarbonate fittings which clip onto the top corners of a frame to allow it to be hung from a wire or narrow bar or rod up to 5mm diameter.

Available in two lengths - however they are quite similar and in many circumstances can be interchanged. The longer clip provides a little extra space for inserting signs. The shorter one wraps around a catenary wire a little more, for situations where the frame may be prone to being dislodged.

Clips are sold in handed pairs.

Additional Information
