Description

Automatic soap dispenser for mounting on the wall

This smart and elegant liquid soap dispenser is perfect in washrooms, kitchens and bathrooms whether in a commercial or residential setting. The well-made 1 litre capacity automatic soap dispenser is now offered at a bargain price which belies the quality of the product.

Here you can source an automatic wall-mounted soap dispenser which is stylish and practical for less than the cost of a manually operated unit - which could be less hygienic as multiple people will touch the lever. Contact-free soap dispensing using a magic eye sensor and an electronic soap delivery system is a superior solution for hand washing in public bathrooms.

Wall soap dispenser is easy to install

Our wall soap dispenser is not just smart to use, it is very simple to install. The wall mounted automatic soap dispenser can be mounted onto suitable surfaces with screws or without tools using a large double-strength adhesive pad. The adhesive fixing option is particularly suitable for mounting onto mirrors or tiled walls. Secure using screws for mounting on a wall which is textured, wall papered or porous (adhesive pad, screws and plugs are included). Screw fixing is recommended for outdoor use.

Contactless soap delivery

Touchless operation is automatic without contact. Simply position the hands beneath the sensor and the correct dose of hand soap is dispensed after 1 second. The inbuilt dispenser pump is battery powered - 4 AA batteries will last many months in normal use without needing to change. A low battery indicator light is provided. Note: Batteries and soap are not included. Both are widely available and our unit will work with any liquid soap apart from speciality foaming soaps.

Main Features of our Automatic Soap Dispensers

- Attractive two-tone (white-black) casing is stylish and robust.
- Sensitive hand detection sensor gives trouble-free operation, delivering soap directly into the hand.
- Long lasting battery-operated with 1 litre refillable reservoir in a smart and robust housing
- Requires 4 x AA batteries which will deliver 1000's of accurately metered doses of soap

More Information

More about the wall soap dispenser

The smart housing is made from ABS – a tough and hygienic engineering plastic. It opens at the top with a push-in key giving access to the liquid soap storage reservoir which takes 1 litre, enough for approximately 1000 uses before refilling on the 1-shot standard setting. This is the setting we recommend when using most brands of liquid soap.

Where can you use the wall mounted dispenser?

Our automatic soap dispensers are suitable for use in offices, public buildings, colleges, universities, shops, pubs, fast food restaurants and countless other locations. Our wall mounted automatic soap dispenser has now been tested* outdoors in wind and rain. We can now recommend this automatic dispenser for outdoor events – for example screwed onto a wooden post or mounted onto the wall of a mobile toilet block. *Tested over many months without failure or impaired performance. Contactless hand soap dispenser offers reliable touchless gel delivery and is easy to use by children and adults alike. This is an ideal hand wash dispenser for schools where there is a suitable wall for mounting.

Product Dimensions

Product Size: 25 cm high x 15 cm wide x 10 cm deep.
Batteries: 4 pcs Alkaline AA 1.5V
Battery Life: Greater than 20,000 shots
Soap or gel capacity: 1000 ml (1 litre)
Liquid dispensed per shot: 1.0 – 1.5 ml (depends on viscosity of the soap or gel)
Dispenses between refills: approx 1000
Sensing distance: 1 cm to 10 cm
Ensure the bottom of the dispenser is mounted at least 25 cm (10") above any surface

Assembly and Installation

Fitting instructions included

Please follow the mounting and setting up instructions included.

Ensure the bottom of the dispenser is at least 25 cm (10") above any surface to prevent misfiring.

If the adhesive pad wall-mounting option is preferred we stress that the surface must be perfectly clean before application and firm pressure across the whole adhesive area is required. We recommend that the dispenser is not fully filled with soap for 12 hours to give the adhesive time to cure and achieve full bonding strength.

A switch inside the housing enables the unit to be set to deliver a single shot dose or two successive doses. We suggest the one-shot setting is generally suitable (switch in down position).

Delivery and Returns

- We offer a choice of delivery options tailored to the goods selected and your location, calculated for you automatically in the Checkout. When feasible, you will be offered options for Free, Economy or Next Day delivery.
- Any product returned by the purchaser must be unused and in its original packaging, which should be unmarked. If goods are received damaged or faulty we will take care of the problem.
