Description

Room door name signs - using printed inserts

Door name signs can be created and printed on your PC or Mac and displayed easily and professionally in these versatile and budget-friendly snap frames. Whether you require many different personalised office signs or a few bedroom door signs these simple-to-use door name sign holders are designed to offer an effective low-cost solution.

Different size room name signs are available. The snap frames featured here are either A5 size - that's half A4 so two name signs can be printed on one page - or A6 size for smaller door signs - with potentially four names per A4 printed page. The design and style of print can be adapted by you to reflect your style, logo-theme, or if you want to incorporate pictures.

How to use printable room door signs

These room door signs are called Opti frames - a special type of snap frame with extra features: safety tipped corners and a moulded back panel offering three ways to mount. They can be used landscape or portrait.

Choose the size and colour you prefer. A5 size is almost the same size as 8x6 inch photo size while A6 is more compact, equivalent to 6x4 inch photo size. The available colours in this range are silver (smart satin aluminium finish), classic black, or a realistic wood effect paint finish. Each frame comes with a clear plastic poster protector, with print changeover accessed by snapping open the frame surround. The frames have specially moulded back panels enabling you to fix with screws or adhesive tape (see Recommended Accessories), or even hang on a nail on the wall next to the door. If you require larger door signs with printed inserts we also offer other products such as [A4 snap frames](#) (in a range of colours).

Creating your own sign inserts can be done in many different software Apps - or you can get them designed and printed professionally.

Assembly and Installation

Fix Opti frames using screws

- The usual way to permanently fix Opti frames is with screws.
- Screws and plastic wall plugs are not supplied as these frames can be fixed to different surfaces.
- When screwing onto wood wall plugs are not needed
- A drill and screwdriver are required for screw fixing (and we recommend using a spirit level and tape measure to ensure the frames are properly aligned). If in doubt please consult a proficient DIY or trades person.

Fix Opti frames using adhesive tape

- Rolls of double-side adhesive tape are available as an accessory item.
- If **double-side adhesive tape** is used to fix frames please check the smoothness and suitability of the wall.
- Tiles and similar surfaces are generally suitable provided they are cleaned thoroughly before application.
- Tape fixing is not suitable for surfaces with a non-stick coating or porous/foamed surfaces.
- We recommend that tape is used around the full perimeter of the frame.
- Larger frames are normally best screwed. A residue of foam tape will be left on the wall or door after removal of the frame and the frame will usually be hard to get off.

Delivery and Returns
