Description

LED light box wall mounted - easy change poster inserts

These stylish light boxes are generally wall-mounted. A poster illuminated from behind really captures attention - especially after dusk. The sleek silver aluminium design is equally at home as a menu sign box displayed in a restaurant window or as an illuminated picture frame in a smart office, studio or home movie theatre.

LED technology creates an ultra-slim display lightbox with low running costs and a long-life light source. The illumination level is approximately 2000 LUX - see Product Dimensions for details.

- Posters displayed in light boxes would be printed on translucent paper - ideally on backlit film for the most vivid effect.
- Wall-mounted LED light box with a depth of just 19mm (3/4") in a sleek aluminium case.
- Snap frame front lightbox for quick and convenient insertion of posters - the profile width is 25mm with a gentle cushion curve.
- Within the frame, edge lighting of the specially designed light guiding plate achieves even illumination and a bright image.
- Wall mounting hardware is included. This range is for indoor use only.
- Smart LED light boxes are supplied with a 13A plug incorporating a neat mains transformer and a connection lead which plugs into the lightbox - no special wiring required, as long as there is a mains socket handy.
- Snap light box comes with an anti-glare poster cover sheet made from high-quality PET. Posters are changed in situ by hinging open the frame surrounds.
- Full range of sizes from A4 to Ao poster sizes and the Movie poster 30 x40 inch - lightbox for Quad posters

- The power supply is rated for 16 hours a day of continual use, 24 hour continuous use power packs are available on request at an additional cost.

Installation guide

Please be careful when positioning your led lightbox; they should be more than 30cm from a sunny window and 50mm away from air conditioning units. This will ensure the best performance from the high-quality Osram LED modules.

More Information

LED Illumination has many advantages.

- LED is the longest life light source for wall light boxes (no tubes to change every couple of years) with the lowest running costs.
- These great features are combined with bright illumination, cool running, excellent reliability and no maintenance for up to 100,000 hours.
- The life cost of LED (light emitting diode) lightboxes is significantly lower than other lightboxes because of the greater energy efficiency.
- The environmental advantages of lower energy use represent a persuasive argument.

CE listed electrical components and all units are CE/UL PAT tested. Each lightbox is supplied with Quality Compliance Certificates.

Power consumption - All models are supplied with a 16-hour/ 7 day mains transformer (see below).

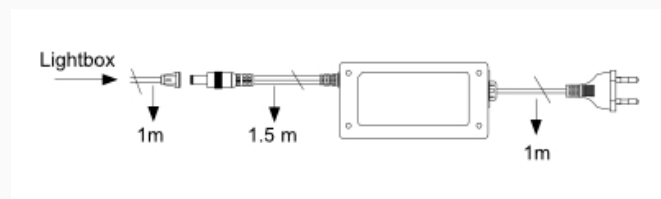

Size	Power Consumption	Mains Transformer Supplied
A4	0.5 Amps	1 Amp 12V
A3	0.8 Amps	1 Amp 12V
A2	1.1 Amps	2 Amp 12V
A1	1.6 Amps	2 Amp 12V
A0	2.3 Amps	3 Amp 12V
30x40 inch	1.9 Amps	3 Amp 12V
