Description

Durable Duraframe MagnitFrames adhesive backed with magnetic poster holder

Professional print holders backed with a clear adhesive which can be repositioned or removed without leaving a residue on any suitable smooth surface. Simply lift open the magnetic lens to insert your print. When positioned on glass or clear acrylic the sign in the DuraFrame can display single- or double-sided.

- Slender design means Duraframe appears virtually flush with the surface it is stuck to.

- Simple border to the clear lens frames your print in either black or silver.
- Peel off the protective backing and apply to glass, plastic, metal, dibond, ceramic tiles, shop windows, glass partitions, some doors, laminates and many other surfaces.
- Suitable for attaching signs and notices to flat or curved surfaces.
- **Largest stocks in the UK for next day delivery.**

MagnetFrames are priced singly.

Applications

Window poster mount with magnetic front | Repositionable A4 holder | Silver or Black + other frame sizes

MagnitFrames are perfect for use on smooth hard surfaces. The frame will accept standard size paper printed on a regular office printer - inkjet or laser is fine. Pre-printed leaflets and flyers can also be displayed. The frame will accommodate either thin or thick paper and two sheets can be used back-to-back for double-sided use on windows or glass doors.

There is a consideration with double-sided display, called 'show through'. When viewed from the less well lit side (generally from inside of an external window) the outward facing print may be partially visible from inside in reverse. This can be avoided by putting something opaque in between the two back-to-back prints. Our Chalk Cards (made of thin yet opaque black plastic) can be used successfully to avoid show through. Order [Chalk cards here](#).

MagnitFrames are also known as Duraframes (and formerly Magaframes). Duraframe is the trademark of Durable. The concept of magnet covers used to retain printed signs is not new but the method of construction of this product imparts a sleek and polished appearance. The use of a repositionable adhesive adds extra versatility. The anti-glare PVC front lens improves performance where reflections would otherwise present visibility issues.

Adhesive magnetic frames perform a similar function to [Window Wizards](#), except that the latter does not have a border to frame the print and attaches without adhesives. Popular applications also include:

- Freezer contents displays in commercial / wholesale environments.
- Picture frames on domestic fridges.
- Shopping list holders on domestic fridges.

More Information

Product Dimensions

Product Code	Poster Size	External Size
MAG.A6	105X148MM	176X130MM
MAG.A5	148X210MM	176X236MM
MAG.A4	210X297MM	236X323MM
MAG.A3	297X420MM	325X445MM

Assembly and Installation

1 Remove the protective film

2 Attach in the desired position

3 Lift the front frame and insert materials

Simple! Frame can be fixed on solid and smooth surfaces. Can be removed from surfaces such as glass

Delivery and Returns

- We offer a choice of delivery options tailored to the goods selected and your location, calculated for you automatically in the Checkout. When feasible, you will be offered options for Free, Economy or Next Day delivery.
- Any product returned by the purchaser must be unused and in its original packaging, which should be unmarked. If goods are received damaged or faulty we will take care of the problem.
