

## Self adhesive A4 & A3 wall notice holder

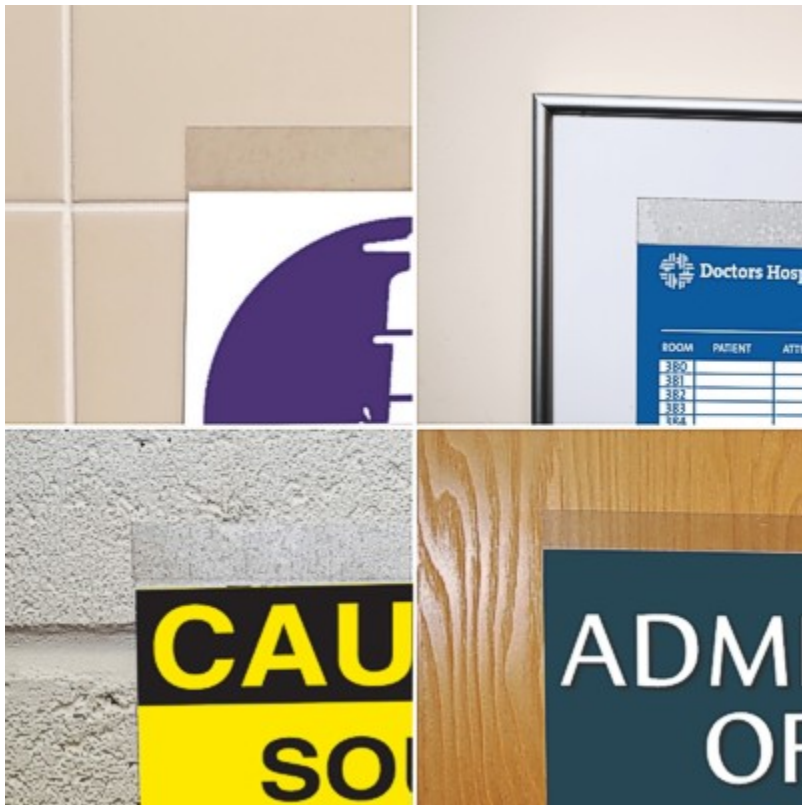

### Short Description

Self-cling clear sign holders are designed to seamlessly adhere to glass surfaces without the need for adhesive tapes or tacks. This method of display ensures that notices are presented in a clean, unobtrusive manner, enhancing readability and maintaining the professional appearance of education and healthcare environments. Unlike sellotape, which can turn yellow and peel over time, self-cling sign holders maintain their clarity, ensuring that essential notices remain visible and legible for longer periods.

### Self adhesive notice holders which peel and re-stick

Stick, peel and re-stick these amazing A4 Noteplexx notice holders onto multiple surfaces ranging from glass to painted concrete, without leaving any residue or mess.

The special gecko-like adhesive hardly loses its clingy properties over repeated uses and lets you reliably stick up notices without tools and without damage - and re-stick time after time.

- Self-cling pocket sign holders adhere to surfaces such as smooth tiles, painted plaster walls, wooden doors, whiteboards, mirrors and many types of wall panel (not fabrics or flaky surfaces).
- Like the pads on geckos' feet the transparent sticky strips at the top and bottom of the holder hardly even feel sticky, yet remarkably they cling to most surfaces and stay put until peeled off. It's called nano adhesive technology.
- Self-adhesive pockets can be used successfully on glass doors and windows with the paper facing either inward, outwards OR double-sided - ideal for fixing posters on shop windows.
- Noteplexx Info display holders can be removed and re-applied many times so they are perfect for frequently changing signs. Simply smooth onto a suitable clean surface with firm thumb pressure along the top and bottom strips.
- Now available in A3 size.

**Please order in even multiples** (e.g. 2, 4, 6 etc.) as Noteplexx is packed in 2's, but they are priced singly.

- Food hygiene certificate wall notice holder.
- Clear A4 & A3 certificate notice holder sticks to almost every surface, including glass.
- Repositionable self-adhesive A4 & A3 notice holders.

### People also ask

Will the self cling notice holder stick to glass?

Yes, it will stick really well to glass to hold a certificate or notice.

Can the self cling notice holder be removed and repositioned?

Yes, you can remove and reposition the notice holder many times; a top tip is to wipe the cling surface with water and a clean cloth and then dry it before repositioning. you only need to do this if you move your sign regularly.

Can the self cling notice holder be cleaned?

Yes, you can clean it with just water or a mild spray detergent, it will also protect your sign from damage and look more professional than just paper taped to a window.

### More Information

#### ADDITIONAL INFORMATION

Noteplexx comprises a clear PVC foil with adhesive strips at top and bottom. The A4 sheet of paper (or two sheets when used back-to-back) fit between the strips. The overall height of the product is therefore greater than A4. A protective film covers the strips during shipping which should be removed before use.

The term pocket conveys that the paper is sandwiched between the Noteplexx and the surface to which it is adhered. Noteplexx is a single sheet product and does not have a backing. So when applied to glass the paper will be in contact with the glass. When applied to single-glazed external windows the paper sign may be subject to damage from condensation under some conditions. While Noteplexx sticks well to many different surfaces there are some points to consider:

- The surface must be clean, dry and homogenous - surfaces such as concrete need to be painted or otherwise sealed in order to provide a coherent surface at microscopic level to enable the nano adhesive to grip.

The same would apply to MDF surfaces.

- Before committing to a large scale project please test the Noteplexx performance in the intended situation over a few days as we cannot guarantee that the self cling properties will work universally (for instance anti-graffiti paints are formulated specifically to reduce adhesion).

'Greasy' environments like chip shops might also present problems.

- In sunlight (for example when used inside shop windows) the effects of UV radiation are likely to make the PVC yellow over time and possibly become brittle.

The product is quite new and long term testing to establish the life of the product is still underway.

- Whilst we have found in tests that the product can be removed without leaving sticky residue there can be some discolouration of paintwork. Whilst made in good faith, we cannot offer a warranty about our statement that Noteplexx can be removed without damaging the underlying surface. We therefore suggest that you refrain from using the product on wallpaper or similar fragile surfaces which cannot easily be 'touched up'.

### Product Dimensions

Product Code	Poster Size	Top Strip	Bottom Strip
NP.A4	210X297mm	210X20mm	210X20mm
NP.A3	297X420mm	297X20mm	297X20mm

## Delivery and Returns

- We offer a choice of delivery options tailored to the goods selected and your location, calculated for you automatically in the Checkout. When feasible, you will be offered options for Free, Economy or Next Day delivery.
- Any product returned by the purchaser must be unused and in its original packaging, which should be unmarked. If goods are received damaged or faulty we will take care of the problem.
