

Door nameplate holder - small curved

Short Description

- Small business door sign with gentle curved front face to take printed paper inserts
- Convenient 10x10cm (4 inch square) with screw fixings to attach to room doors (or can be stuck)
- Quality clear plastic lens flexes into place to hold nameplate sign in place - smart and discreet

Product Images

Square office name plates

These square office name plates take your own small printed inserts 4 inch (10cm) square. Tamper-resistant and sturdy metal door nameplate holder which fits flush to the door featuring a slightly curved face. These small door signs with changeable inserts are versatile and ideal for presenting a smart image, especially if you include a logo on each print.

- These economical frames for business door signs are suitable for offices, residential accommodation, and educational premises.
- Suitable for use indoors as a door name plate holder offering the opportunity to produce your own signs 'in-house' on ordinary paper using a standard office printer. Simply trim to size after printing and insert into the holder.
- Curved office name plates can be screwed to the door or fixed using double-sided adhesive tape (depending on the surface). Very secure design whilst allowing frequent updating of name.
- The body of the sign is a curved aluminium extrusion with a smart brushed silver finish, fitted with two black end caps to create a smooth snag-free design with no sharp edges.
- A clear lens is snapped into the body of the sign, simply by flexing, to retain your printed insert in place.
- This protective cover can be removed with a sucker (supplied) when it is time to update the information - for example when a person moves office or a resident departs.

More Information

Small frames for internal door signs

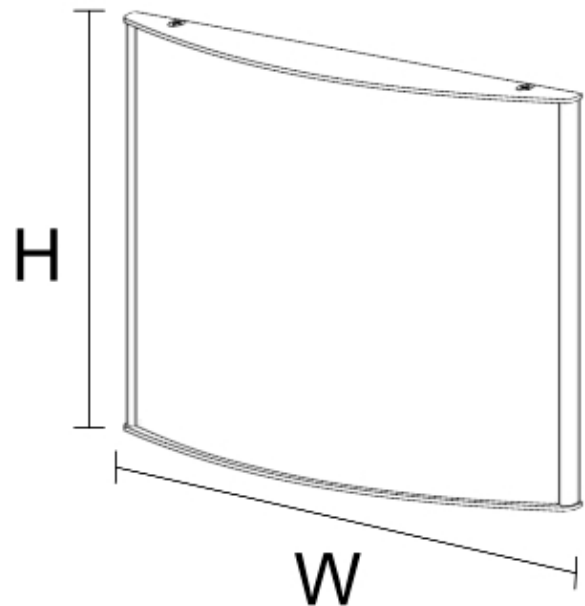

Signs can be printed on a laser or inkjet printer and cut to size using a trimmer or office guillotine paper cutter. The cut size should be 100x95mm. These frames or name plate holders can be fixed as shown or rotated through 90 degrees so that the curve runs top to bottom instead of from side to side.

Tip: Use the lens as a cutting guide to ensure your insert will fit correctly.

Our Alu Eclips frames can be combined with other curved face systems: for example Vista System, Insertz, Architech as the basic design of each is very similar. If in doubt why not order a single 100mm square Alu Eclips frame for evaluation? A reduced P&P charge will replace our standard carriage charge when you order one or two online on this website.

Product Dimensions

Product Code	Product Name	Product Dimensions (mm)	Paper Size (mm)
EC.100	100 X 100 Wall Sign Holder	107 X 107(HxW)	100 X 100

Easy to fit internal door signs

Assembly and Installation

- Curved aluminium door signs can be fixed with screws or with double sided adhesive tape. They can be fixed directly onto room doors or on the wall adjacent to the door.
- Screws and wall plugs are supplied for wall fixing. When fitting directly to the door the supplied masonry plugs should be replaced by a suitable fixing dependant on the type of door.
- Double-sided adhesive tape is not included but can be ordered from us: [Click here](#)
- One or more suction cups is supplied with every order (not one per frame - for larger orders a few are supplied). These are an aid to removing the clear plastic front lens.
- Print and trim your room signs. We suggest the front lens is used as a size guide for trimming. The paper should be the exact same size as the lens for a perfect fit.

Delivery and Returns

- We offer a choice of delivery options tailored to the goods selected and your location, calculated for you automatically in the Checkout. When feasible, you will be offered options for Free, Economy or Next Day delivery.
- Any product returned by the purchaser must be unused and in its original packaging, which should be unmarked. If goods are received damaged or faulty we will take care of the problem.
