Description

Directional signage system - 60cm long slats

The large directory slat system is an ideal sign system for wall mounted signage in reception areas and offices which require bespoke directional signage. A larger header slat is usually displayed to show the company name or logo with additional slats underneath to form a complete directory sign system. These are perfect for interior signage in buildings that require occassional updates of the inserted graphics.

- Can be used with printed sign inserts or flexible sign substrates up to 1mm thick. Supplied with suction tool to aid removal of the transparent plastic protector lens.
- Curved silver aluminium slat 600mm (2ft) wide - starter set has 150mm (6") high top slat with three slats for changeable information each 100mm (4") high.
- Modular system so different height slats of the same width can be combined as required to make up directory signs.
- Each slat is supplied with adhesive tape pre-applied to back of sign for mounting directly to the wall. Alternatively the individual slats can be mounted onto a backing board which is in turn screwed to the wall.
