or stood on a counter. The top-loading Alu Profile frame is pictured with a display board in place - as supplied the frame is open through the middle so that, with the appropriate fixing method, the display board may be viewed from both sides.

- We can supply various accessories including wall fixing clips, suspension clips, backing sheets, poster cover sheets, chalk cards etc.
- On sales counters and tables these aluminium frames can be used with free-standing feet, either single-sided (angled) or double-sided (standing upright) by selecting the appropriate fittings for perfect promotional displays.

The standard finish is silver anodised aluminium. Frames are delivered assembled **without** a backing sheet or cover sheet.

Series 500 fittings attach to the rim of Alu profile frames

The range of available fittings makes this metal poster frame highly versatile. Frames can be wall-mounted, suspended, stood on a counter, etc.

Applications for aluminium (Alu Profile) slot-in frames.

These frames are very high quality and are perfect for holding display boards which are slotted into the frame and so can be changed and updated easily.

Aluminium profile frames have been used successfully by several retail chains including DIY stores, photographic retailers and a high street fashion chain.

Because the frames are made of metal they are inherently strong and can be used in special POS display situations.

A particular advantage of these frames is that they can be used double-sided - because they are back-less and look identical when viewed from both sides.

They are used for suspended signage over shopping aisles to identify sections, special promotions and so forth.

Special colours and custom sizes are available subject to minimum order quantities.
