More Information

- The insert slot in the frame is 4mm deep. The wooden poster frames are therefore suitable for rigid posterboards such as foam centred board 3mm thick.
- When stood on a tabletop (using upright feet) these wood poster frames can be used double-sided.
- Woodline frames fit standard paper sizes exactly - if you wish to laminate your print (which may be advisable in a kitchen servery or restaurant environment) you will need to trim it back to A4.
- Beech is the only colour we stock but for a minimum of 50 frames (100 frames A3 and below) we can manufacture frames stained to a special colour.
- Please bear in mind that wood is a natural material and colour variations are to be regarded as a normal feature of the product. Staining to exact shades is impossible because the wood reacts to the stain in its own way.
- If you want a painted finish poster frame it may be better to choose the very similar looking [slide-in aluminium frame](#) which can be powder coated to precise RAL colours.
