### Plant pot price display holder A4

This version of the A4 Slim frame stays put in the wind as a result of being attached to a heavy upturned plant pot. A specially adapted T-piece allows rapid and secure attachment to a typical plant pot with a central drainage hole placed upside down .

- Easy fitment with no tools required.
- Re-useable.
- Landscape or portrait sign for attaching to plant pots.
- Many colour options - choose from the drop down list.

The so called T-pot fitting is manufactured with a protruding threaded stud and supplied with two large nylon washers (to protect the pot) and a large wing nut which does up from inside the pot. The thread of the T-pot is long enough to pass through the thickness of a large flower pot. *The terracotta pot is not included in the price.*

The A4 frame (included in the price) and T-piece are supplied in a range of colours - select from the drop down box.

More Information	<p><b>More details about this sign fixing method</b></p> <p>A4 size frame comes as standard but the supplied T-Pot fitting is also compatible with A5 frames which can be ordered separately.</p> <p>The A4 frame also fits laminated A4 paper (i.e. it fits the extra 3mm border over and above regular A4 size).</p> <p>The threaded stud is zinc plated to resist rust. The pot should have hole with diameter at least a 12mm (1/2") which is typically found in larger terracotta flower pots. The threaded stud is 10mm diameter.</p> <p>The supplied nylon washers should be used either side of the hole through the pot. The wing nut should be done up hand tight (against a nylon washer) from inside the pot. Please ensure that the T-piece and frame are secure and that the pot is heavy enough to prevent toppling.</p>
