Description

Pallet wedge new design landscape and portrait A4 sign ticket holder

Pallet Wedge is an A4 size POS display holder which sits on the floor with its elongated base trapped under the pallet. The angled frame makes for easy viewing without restricting access to merchandise (such as peat and compost) stacked on the pallet.

- Galvanised steel construction is sturdy and durable outdoors. The underside of the base is protected from

scuffing on rough concrete by a tough plastic sleeve.

- A4 POS frame is secured to the metal body by clips attached by wing nuts making initial fitting and exchange easy; in the event of damage to the frame – e.g. by out-of-control shopping trolleys.
- The frame displays laminated A4 signs (landscape and portrait) which are slid in through a slot in the edge and supported within the frame by a correx backing sheet.
- The ABS plastic frames are available in several colours – please select from the drop-down menu.
- **The original pallet wedge sign holder and by far the best!**

| More Information | <h3>How to use the A4 Pallet Wedge</h3> <p>The Pallet Wedge has to be positioned before the pallet is lowered by the pallet truck to ensure part of the base is trapped under the pallet. Don't stick it too far under the pallet – then there is scope for a degree of overhang of goods stacked on pallets; e.g. bags of compost.</p> <h4>Spare Parts</h4> <p>The frames supplied are pretty robust but in the case of breakage, replacements can be ordered. These are standard Slim Frames available to order on this website (Order Code SL.A4).</p> <p>If the plastic clips which hold the frame to the metal stand break these too can be ordered online. They are called Keyhole Wall clips (order Code OEK.145).</p> <p>If you need replacement bolts and wing nuts you will need to call us as we do not sell these online.</p> |
